

Correction letter 1 – KBH02

3. marts 2020

Regarding: Construction incl. Marine Cargo and Third-Party Liability Insurance.

**Addendum to Section 4 Marine Cargo according to the content of the Schedule on pages 37/38
“Information”**

Energinet has decided to sign an Offshore Cable contract where Energinet has the responsibility for the transport from Zealand harbor until site in KBH.

The value of the Offshore cables is DKK 55,000,000,

It is expected that the Offshore cables will be loaded directly on to the installation vessel on the turning platform but the situation can end up with a solution where the Offshore cables will be unloaded on the dock/quay and pick up at a later stage.

The insurance company is requested to include Marine Cargo cover incl. cover for unloading/loading and during stay on the dock/quay.
